

UPLIFT DESK®

LIFESPAN TREADMILL

Adding a LifeSpan Desk Treadmill to your standing desk will take your workstation to the next level, giving you the option to sit, stand or walk while you work. Each treadmill comes with a desk console that tracks time, calories burned, steps taken, and distance walked. LifeSpan Desk Treadmills also feature Intelli-Guard technology, which automatically pauses the treadmill after 20 seconds of non-use, and Intelli-Step, which counts your steps. The console includes a safety key that stops the belt instantly if pulled out.

Each treadmill features a motor designed to be quiet and unobtrusive. Deck suspension includes six impact-reducing compression shocks for smooth, comfortable walking. The treadmill arrives fully assembled, with casters at the front for easy positioning and movement.

TR800-DT3

The perfect choice for an individual workstation or home office set up with a single user, recommended for up to three hours of use per day. It's 4" shorter than the models below, making it a good option for smaller spaces.

TR1200-DT3

A heavier-duty model recommended for up to six hours of use per day. This is the best option for people who want to walk more than three hours each day, or for people who share a home office.

TR5000-DT3

A commercial-grade treadmill that can be used up to ten hours per day. It's a good choice for multi-user workstations to be shared among employees.

UPLIFT DESK®

LIFESPAN TREADMILL

Specifically designed to be used for walking, the maximum speed of each treadmill is 4 mph, but most users find it comfortable to walk between 1 - 2 mph while they work. Each of these three models is backed by a lifetime warranty on the frame and a 3-year warranty on the motor.
